Enable Amazon Alexa Integration feature

Acer Air Monitor integrates with Amazon Alexa service which enables you to ask Amazon Device (e.g. Echo, Dot, Tap) for your air quality.

After setup, to know your indoor air quality index, you can say:
"Alexa, ask Air Monitor how's my air quality?"

You can find and enable Acer Air Monitor skill in Amazon Alexa skill page, or search "Acer" for our skill in Amazon App.

The first section will instruct you how to setup and enable the Amazon Alexa Integration feature for the Air Monitor in Amazon App.

The second section will guide you on how to use the Acer Air Monitor skill.

* Please note that the Acer Air Monitor skill currently only support English language.

Before you begin:

1. Make sure that your Amazon Device is set up and connected to Wi-Fi.

2. Make sure that your Air Monitor has been setup and connect to the Acer Cloud

Note. To setup your Air Monitor connection to the Acer cloud follow the User Manual section to setup: [Setting up the device] - [Acer Cloud connection through Wi-Fi]

2. Using Air Monitor skills

The Air Monitor skill will tell you about your air quality which is measured from your Acer Air Monitor.

Once you've enabled the skill, you can say:

- "Alexa, open Air Monitor" then "How's my air quality?"
- Or, "Alexa, ask Air Monitor how's my air quality"

(1) To know your indoor air quality index, or other specific indexes, you may say:

· "How's my air quality?"
· "How is PM 2.5?"
· "Tell me about PM 10"
· "Air quality index"

Here are all the indexes you can ask about: air quality, temperature, humidity, PM2.5, PM10, CO2, TVOC.

(2) To know about all your indexes, you may say:

· "How are all indexes"
· "Tell me about all the indexes"
· "All indexes"

(3) To get more knowledge about each air quality index, you may say:

· "Give me PM2.5 Knowledge"
· "Get knowledge about CO2"
· "PM10 knowledge"

Here are all the indexes you can ask for more knowledge about: air quality, temperature, humidity, PM2.5, PM10, CO2, TVOC.
